SUMMARY

Enthusiastic undergraduate student majoring in Information Technology with a focus on Cyber Security, complemented by a strong foundation in multimedia and graphic design. Skilled in tools such as Adobe Illustrator, Photoshop, After Effects, Premiere Pro, and Blender, with prior training from a vocational high school in multimedia. Experienced in leading creative and technical projects as Head of the MTDD division in the PUDC club, combining design expertise with organizational leadership. Hands-on practice in cybersecurity challenges including OWASP Juice Shop, picoCTF, and digital forensics investigations using Autopsy and Wireshark. Proficient in Kali Linux, Burp Suite, NetworkMiner, VirtualBox, and programming with Python, PHP, and MySQL. Passionate about bridging creativity and technology—securing digital environments while crafting impactful visual designs and media.

EXPERIENCE

Developer Club: PUDC

HoD of MTDD Division

📅 10/2024 - Present 📍 Cikarang, West Java

- Lead the club in MTDD division
- Creating the club logo

Member of MTDD Division

📅 10/2023 - 09/2024 📍 Cikarang, West Java

- Participate in all event in the organization as MTDD
- PIC MTDD of the biggest event in the Computing Faculty

Religion Club: KMHD (2023-2024)

Member of MTDD Division

📅 11/2023 - 09/2024 📍 Cikarang, West Java

- Participate in all event in the organization as MTDD

CV. LEO Printing

As 2D Digital Designer

📅 06/2021 - 11/2021 📍 Batam, Riau Islands

- Handling all 2D Design and printing process

PROJECTS

Secure Signature App

📅 04/2025 - 05/2025 📍 Cikarang, West Java

The Digital Secure Signature Application guarantees the integrity and authenticity of signed documents by using cryptographic techniques. This project offers a viable solution for securely signing documents across various sectors

CTF University-Level

📅 02/2025 - 03/2025 📍 Cikarang, West Java

Participated in a university-level Capture The Flag (CTF) challenge as a final test, where I applied practical skills in ethical hacking, vulnerability exploitation, and problem-solving under time constraints. The challenge involved real-world scenarios designed to test knowledge in web security, cryptography, forensics, OSINT, miscellaneous, and network analysis.

Smart Surfing: Internet Safety and Tech for Better Living

📅 06/2025 - 07/2025 📍 Cikarang, West Java

This social project focuses on internet safety and technology to improve living conditions. The project aimed to educate teenagers in Lamajang Village, Bandung, about internet safety, fraud awareness, and practical cybersecurity measures. Additionally, the group is collaborating with PT. NIPPON STEEL to conduct a tree-planting initiative to promote environmental sustainability.

PROJECTS

Web Portfolio

📅 06/2025 - 07/2025 📍 Cikarang, West Java

Developed a personal portfolio website to showcase my academic journey, technical projects, and personal growth throughout university. Designed and implemented both the frontend and backend using HTML, Tailwind CSS, JavaScript, and PHP. The site features a responsive and modern UI, project galleries, and a detailed experience timeline. Integrated dynamic content handling and form submission with custom backend logic to ensure smooth and interactive user experiences.

SKILLS

Multimedia

Photoshop Illustrator Premiere Pro After Effect Blender Canva

Cyber

Oracle VirtualBox Kali Linux Burp Suite Autopsy NetworkMiner Wireshark

IT
