SUMMARY

Undergraduate Information Technology student specializing in Cyber Security, with hands-on experience building and deploying a production-grade AI-powered CCTV system during a software engineering internship. Developed full-stack features using React and FastAPI, integrated YOLOv8 and OpenCLIP for real-time object detection and semantic video search, and containerized the entire system with Docker Compose. Holds an AWS Certified Cloud Practitioner certification. Complements software experience with practical cyber security skills in ethical hacking, digital forensics, and network analysis, with exposure to tools such as Kali Linux, Burp Suite, Wireshark, and Autopsy. Eager to contribute to roles at the intersection of software development and security.

EXPERIENCE

Internship at Telkom STO Kebayoran

IT Intern

📅 09/2025 - 04/2026 📍 South Jakarta, Jakarta

- Contributed to the end-to-end development of an AI-powered CCTV/NVR system as the core company product, spanning UI/UX design, full-stack development, AI integration, and cloud deployment.
- Containerized the entire system using Docker Compose, integrating five services (React/nginx, FastAPI, MySQL, mediamtx) into a production-ready, network-agnostic deployment
- Explored AWS cloud deployment for the system and earned the AWS Certified Cloud Practitioner (CCP) certification during the internship
- Participated in internal IoT product testing for a Hajj/Umrah luggage tracking system

Developer Club: PUDC

HoD of MTDD Division

📅 10/2024 - Present 📍 Cikarang, West Java

- Lead the Media, Technology, Design & Documentation (MTDD) division, overseeing all creative and digital output for the club
- Designed the official club logo, establishing the visual identity and branding used across all club materials and communications
- Coordinate division members across multiple projects, delegating tasks and ensuring deliverables meet quality and deadline

BEM Faculty: PUFA COMPUTING (2023-2024)

Member of MTDD Division

📅 10/2023 - 09/2024 📍 Cikarang, West Java

- Actively contributed to the Media, Technology, Design & Documentation division across all faculty-level events throughout the academic year
- Appointed as PIC (Person in Charge) of MTDD for the faculty's largest annual event, overseeing all media production, documentation, and design deliverables from planning through execution
- Collaborated with cross-functional committees to produce promotional materials, event documentation, and digital content under tight deadlines

Religion Club: KMHD (2023-2024)

Member of MTDD Division

📅 11/2023 - 09/2024 📍 Cikarang, West Java

- Supported the MTDD division in producing visual multimedia content for religious and cultural events organized by the club
- Contributed to event documentation and design materials, ensuring consistent branding across club activities

CV. LEO Printing

As 2D Digital Designer

📅 06/2021 - 11/2021 📍 Batam, Riau Islands

- Handled end-to-end 2D design and print production workflows, taking client briefs through to final printed output
- Managed pre-press processes to ensure design files met technical specifications for large-format and commercial printing

PROJECTS

AI Smart NVR (CCTV Dashboard)

📅 04/2025 - 05/2025 📍 Kebayoran Baru, South Jakarta

A production-grade, containerized AI-powered Network Video Recorder built as the core client-facing product of the company, where clients can onboard their camera infrastructure by simply providing an RTSP or HLS stream URL and the system automatically integrates and begins processing without any manual configuration. Built on a full-stack architecture combining React 18, FastAPI, MySQL, and mediamtx, all orchestrated with Docker Compose. The system delivers three core AI features: YOLOv8-powered object counting, crowd density monitoring with alert thresholds, and natural-language footage search using OpenCLIP ViT-L-14.

PROJECTS

Secure Signature App

📅 04/2025 - 05/2025 📍 Cikarang, West Java

A web-based digital signature application built to guarantee the integrity and authenticity of signed documents through cryptographic techniques, providing a secure and practical alternative to manual signing across various sectors such as legal, academic, and corporate document workflows. The application allows users to sign documents digitally, with each signature cryptographically bound to the document so that any tampering or unauthorized modification is immediately detectable upon verification, addressing a growing need for trustworthy digital document management in an increasingly paperless environment.

CTF University-Level

📅 02/2025 - 03/2025 📍 Cikarang, West Java

Participated in a university-level Capture The Flag (CTF) challenge as a final test, where I applied practical skills in ethical hacking, vulnerability exploitation, and problem-solving under time constraints. The challenge involved real-world scenarios designed to test knowledge in web security, cryptography, forensics, OSINT, miscellaneous, and network analysis.

Smart Surfing: Internet Safety and Tech for Better Living

📅 06/2025 - 07/2025 📍 Cikarang, West Java

This social project focuses on internet safety and technology to improve living conditions. The project aimed to educate teenagers in Lamajang Village, Bandung, about internet safety, fraud awareness, and practical cybersecurity measures. Additionally, the group is collaborating with PT. NIPPON STEEL to conduct a tree-planting initiative to promote environmental sustainability.

SKILLS

Cyber

- Oracle VirtualBox
- Kali Linux
- Burp Suite
- Autopsy
- NetworkMiner
- Wireshark

IT

- UI/UX
- Tailwind
- React
- JS
- Figma
- Firebase
- Python
- MySQL
- Docker
- AWS

Multimedia

- Photoshop
- Illustrator
- Premiere Pro
- After Effect
- Blender
- Canva

EDUCATION

Candidate for Bachelor for Informatics

President University

📅 08/2023 - Present 📍 Cikarang, West Java

GPA

3.8 / 4.0

Multimedia High School Diploma

SMK Maitreyawira

📅 06/2021 - 05/2023 📍 Batam, Riau Island

GRADE

89 / 100
